EXPERIMENT 2

Read an image and apply Gaussian blur.

Aim

Read an image and apply Gaussian blur.

Algorithm

• Import OpenCV and load the image.

• Check that the image exists.

• Choose an odd-sized Gaussian kernel.

• Apply Gaussian blur to the image.

• Save the blurred image.

Code

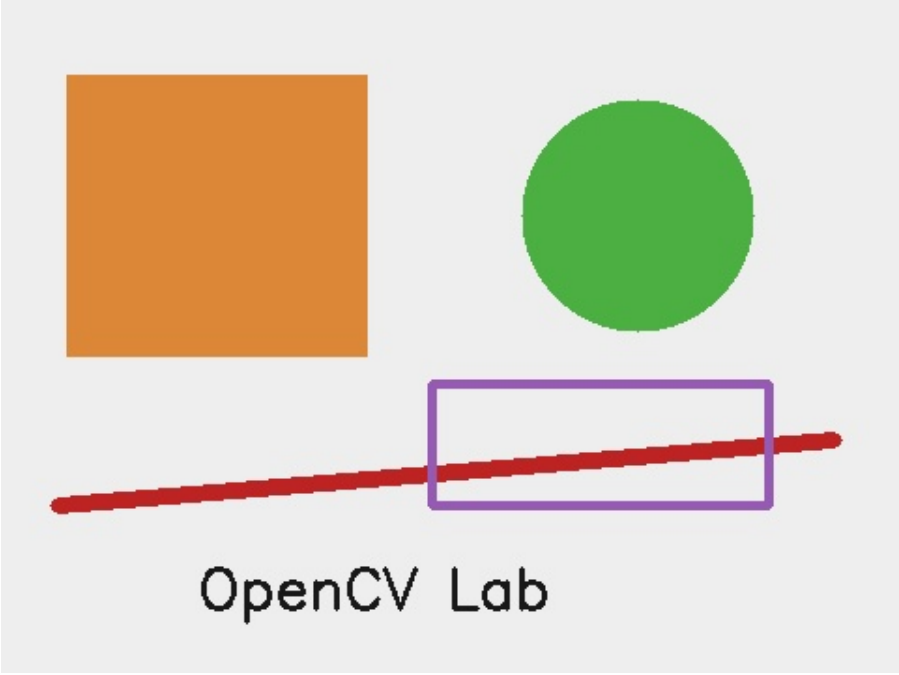

```
import cv2

img = cv2.imread("images/input.jpg")
if img is None:
    raise FileNotFoundError("images/input.jpg not found")
blurred = cv2.GaussianBlur(img, (9, 9), 0)
cv2.imwrite("output_images/experiment02_gaussian_blur.png", blurred)
print("Saved output_images/experiment02_gaussian_blur.png")
```
