EXPERIMENT 17

Insert a watermark into the original image using OpenCV.

Aim

Insert a watermark into the original image using OpenCV.

Algorithm

• Import OpenCV and read the image.

• Check the image was loaded.

• Choose watermark text and position.

• Draw the watermark on the image.

• Save the watermarked image.

Code

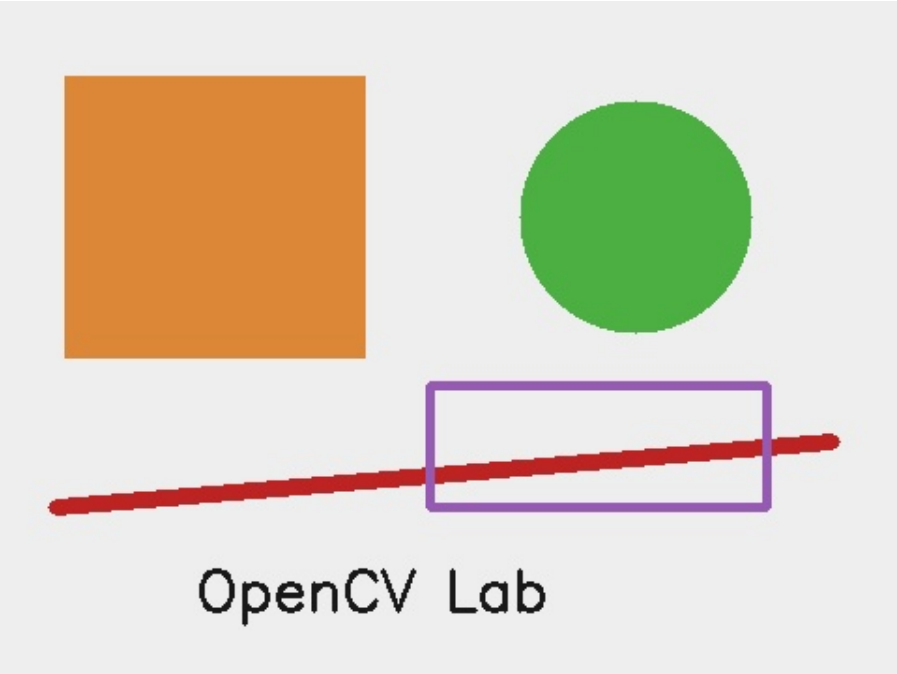

```
import cv2

img = cv2.imread("images/input.jpg")
if img is None:
    raise FileNotFoundError("images/input.jpg not found")
h, w = img.shape[:2]
cv2.putText(img, "WATERMARK", (20, h - 20), cv2.FONT_HERSHEY_SIMPLEX, 1, (255, 255, 255), 2)
cv2.imwrite("output_images/experiment17_watermark.png", img)
print("Saved output_images/experiment17_watermark.png")
```
